

Civic Engagement

An engineer is above all a citizen, and I believe that making our community a better place for everyone is a **key duty of citizenship**. But an engineer models also the future looking of his community. This is why as a future engineer, I must do some **civic engagements**.

School Related Engagements:

- Clean walk in Toulouse
- Class representative

Personal Engagement:

- I sponsor a young student every year in Burkina Faso through ASPA association since 2023.

Planned Engagement:

- I want to be trained to be a staff member during school events to prevent sexual and sexist violence.
